## OBJECTIVE

To secure a challenging position in organization where I can effectively contribute my skills as software professional for growth of organization and myself.

## SKILLS & LANGUAGES

C , C++ , JAVA (CORE & ADVANCED) , SQL , JDBC , SPRING-CORE , SPRING MVC , HTML , CSS , JAVASCRIPT , BOOTSTRAP , ANDROID STUDIO .

## PROJECTS

**Online Event Management**
ROLE :- Full-Stack Developer (HTML, CSS, JavaScript, Email Integration Logic)

I designed and coded this fully functional event management tool from scratch to demonstrate my skills in core web technologies.

**Library Management System**
ROLE :- I am the solo Software Engineer responsible for the entire system's design and implementation.

I developed the logic for dynamic array manipulation, including functions to search for available space when adding a new book, and shifting elements when a book is removed.

**Music Application**
ROLE :- I am the solo Android Developer responsible for the entire system's design and implementation.

A fully functional music playback engine that scans the local device library to populate a dynamic playlist. Includes robust user controls for Play, Pause, Next, Previous, and a Repeat One feature to loop the currently playing track.

## EDUCATION

| July 2024 | **Bachelor of Computer Applications** |
|---|---|
| | Rajarshi School of Management & Technology |
| | I have completed my degree in Computer Applications with 67.5%. |

## CERTIFICATE

**DCSC**

DROP CERTIFIED SECURITY COURSE

DCSC is the most crucial Ethical Hacking course online, which prepares its students with career-oriented techniques. This could be helpful in shaping an individual into a highly qualified and sincere information security professional.
